Fire Weather Planning Forecast  
 National Weather Service Charleston WV  
 535 AM EDT Mon May 23 2022

.DISCUSSION...  
 A wave of low pressure riding up along a front and passing just south and east of the area will bring showers and storms today, especially south and east of the Ohio River.

Expect some clearing tonight into Tuesday, but warm and humid weather returns Tuesday onward. The chance for showers and thunderstorms will progressively increase as another system approaches mid week. A cold front crosses through Thursday into Thursday night, with showers and a few storms lingering on Friday. Quieter weather is expected for the weekend.

.DISCUSSION...

Front to our south will be the focus for rainfall today into
midweek. A soaking rain can be expected today into early
Tuesday, then slightly drier into Wednesday before
another round of showers and storms arrives with
a front Thursday. Humidity levels will stay elevated
all week.

.DISCUSSION...

A front will stall out across the Carolinas today through Wednesday, leading to much cooler temperatures. Low pressure will track along the boundary later today into tonight, bringing rain to parts of the area. Onshore flow will cause low clouds and occasional rain chances to continue through mid week.

The front will lift back to the north as a warm front on Thursday, then a cold front will approach from the west on Friday.
